James
LOUDSPEAKER

Our engineering standards are unmatched in the industry. James' finely crafted speakers are the result of enthusiastic designers. Utilizing 4 Beryllium 1" dome tweeters in a unique 22.5 degrees square array, the array provides high power handling and smooth frequency response across a wide coverage angle.

All James Loudspeaker products are designed by our masterful team of qualified engineers, with many years of collective experience. Designed and manufactured in the USA.

At James Loudspeaker we have a vision for excellence in design, and a dedication to every detail. (AFDC) effectively tunes the system to your room. Optimum performance is achieved through each loudspeaker to accommodate different acoustic environments.

James Loudspeaker...

*In-house designed slimline drivers provide
in-wall installations never before possible.*

In a class of its own!

**Not just state-of-the-art.
The finest relevant design
solutions for your home.**

At James you will find an unprecedented combination of innovative features ensuring excellence in design and quality.

Interior products feature James proprietary ultra-slim driver technology, Adjustable Frequency Distribution Circuit and our quad-tweeter array design. The result is solid sonic precision specially designed to be of minimal visual presence.

in-wall

Model: EMB21 21" in-room Subwoofer

The EMB Series offers a broad selection of in-room and in-cabinet subwoofers models, with optional 1000 Watts DSP amplifier.

subwoofers

"This is no ordinary in-ceiling product. It produces extraordinary, powerful bass, enough to fill even a large home theater. Most impressive is the PowerPipe's ability to disappear, both from visual and aural perspectives."

Alex Gonzalez - Home Entertainment

All James subwoofers offer a seamless fusion of visionary technology and revolutionary performance with the designer in mind. Numerous designs include in-room, in-cabinet, in-ceiling, concealed PowerPipes and in-wall models. With smooth frequency responses and tight transitions, James subwoofers provide a uniquely spacious soundscape like never before.

Model: PowerPipe 1000PT

Flexible tube allows for multiple port placement options.

Model: 101SA-6 Subwoofer - Extraordinary in-wall design.

The PowerPipe architectural port option is the perfect solution for systems installed in cabinetry, in-ceiling, in-closet, an adjoining room, or under the floor; essentially any location!

SA Collection Subwoofers.
Deep bass and high SPL from such a visible opening causes a second take! James engineers are dedicated to maximize the beauty of your home.

SoundBars

James has pioneered the design of ultra-slim SoundBars and now offers two complete series. The SPL3 Series features a 3.5" woofer and is a mere 1.5" deep, yet plays down to 90 Hz. The SPL6 series feature 6.5" woofers for deep bass and high SPL, and only 2.75" deep. Both series feature LCR, Stereo and James' famous Centergy configurations. All bars are constructed of aircraft aluminum and are custom sized to fit your display, and include custom brackets. A wide range of matching on-wall/in-wall surrounds and subwoofers are available to complement any James SoundBar.
