

small aperture®

COLLECTION

James
LOUDSPEAKER

A modern interior space with large floor-to-ceiling windows and a wooden deck overlooking a lake and mountains. The room has a light-colored wooden floor and a white ceiling with exposed wooden beams. The windows are framed in a dark material, and the deck outside is made of light-colored wood planks. The view outside shows a large body of water, a metal railing, and a range of green mountains under a blue sky with some clouds.

The Aesthetic

James Small Aperture® (SA Series) speaker and subwoofer collection blend performance and aesthetics like no other. Designed to satisfy the most demanding designer and listener and engineered to integrate a multitude of architectural demands. Finally, a no compromise solution.

small aperture®

3" grille in wood cabinetry

Experience of Sound.

3 inch round or square Microperf grilles are available. Pre-construction ring options are available for various ceiling/wall materials and thicknesses.

Industry standard 4 inch lighting trim kits can be used to match existing lighting and décor.

Not just a sound in the distance... Make your home come alive with James SA Series 3-way systems. These systems pack 38Hz and broad dispersion in an industry first 3" aperture. Deep bass and wide frequency response from such a small visible opening causes a second take! Plus a seamless edge detail to maximize the beauty of your home.

All aircraft aluminum construction and a modular design provide long life and easy service. The SA series is designed to match industry standard lighting trim kits to allow integration with similar styled lighting products.

"The experience defies logic. How can this 3" flush mount opening in the ceiling produce such astounding sound?"

collection loudspeakers & subs

The world's finest speakers.... free of design and architectural conflicts!

A concealed in-wall subwoofer is available for those demanding the lowest octave of bass.

101SA-6 Subwoofer - Installation in-wall design.

63SA-7 Custom trim ring
