

Qbasic+

DISCOVER THE **BIG PLUS** IN MANUAL-TO-MOTORIZED PREMIUM SHADING

With award-winning design and whisper-quiet operation, the new Qbasic+ shading system from QMotion adds up to be the most innovative manual-to-motorized premium shade in the industry.

Now you can upgrade shading from manual to motorized without the need of changing fabric or major bracket reinstallation.

All Qbasic+ shades are designed to be motor-ready, allowing for upgrades on a window-by-window basis, giving you more choice at initial purchase. Not ready yet to invest fully in motorized? Start with a manual installation in secondary rooms and areas, and upgrade at a preferred time in the future—without any change to the original tubing, fabric, or fascia.

Qbasic+

Manual-to-Motorized Bracketing System

AWARD-WINNING DESIGN

+ Battery or Wire

Whether powered by independent battery or hardwire, the Qbasic+ motor is whisper-quiet, energy-efficient, and responsive to a choice of operating protocols. Additionally, QMotion shades lead the industry in battery life with a patented technology that puts batteries inside the tube, while also providing superior aesthetics with no battery packs, power wires or antennas showing.

+ Patented Manual Override

Once upgraded to motorized, Qbasic+ shades feature QMotion's patented manual override, allowing for hand operation without causing damage to interior mechanisms.

+ Patented Counterbalance

Qbasic+ shades feature QMotion's patented counterbalanced control to create less resistance and enable a lighter, easier, and more controlled pull-force than a typical manual shade of the same size.

+ Recognized by Industry Experts

The Window Covering Manufacturers Association (WCMA) recognized Qbasic+ as the 2018 Best Technical Innovation in the category of Motorization and Automation.

The break-through innovation of Qbasic+ begins with its uniquely designed mounting bracket, which once installed, does not need to be removed from the wall during the upgrading process.

Your QMotion dealer is experienced to complete an upgrade on-site and trouble-free, simply by changing the connector insert on each mounting bracket and then swapping out the manual clutch for the concealed motor.
