The epitome of aural perfection. *Enjoy.*

James
LOUDSPEAKER

At James you will find an unprecedented combination of innovative features ensuring excellence in design and quality. Interior products feature James' proprietary, ultra-slim driver technology, Adjustable Frequency Distribution Circuits, and our quad-tweeter array design. Landscape products include our new 2-way All Terrain speakers systems, James proprietary DSP control, ultra-slim driver technology, and low distortion 70V distribution. This combination results in an unmatched auditory masterpiece, specially designed to be of minimal visual presence.

Nothing is better than a fresh ocean breeze, the gentle clapping of waves against the stern and the feel of the sun's warmth upon your shoulder. It's your music that fills this new air. Rest assured, we have all your audio system essentials marine ready with sealed aircraft aluminum enclosures, powder coated aluminum grilles, aluminum constructed domes, rubber surrounds and marine grade hardware.

AT Collection 42AT Tree Installation

The Aesthetic Experience of Sound

Full 3-way design from only a 3 inch opening!
2" mid & 3/4" tweeter offer excellent off-axis coverage.
Complex multi-element network for silky smooth response.
Concealed Micro-PowerPipe™ woofer for 38Hz bass response.
Easily removable mid/high module and built-in overload protection circuitry.
All aircraft grade aluminum construction.

3" grille in wood cabinetry

3" round or square pre-construction ring options are available for various ceiling/wall materials and thicknesses

Not just a sound in the distance...

Make your home come alive with James SA Series 3-way systems. These systems pack 38Hz and broad dispersion in an industry first 3" aperture with a seamless edge detail. The deep bass and wide frequency response generated from such a small visible opening is not only pleasing to the ear, but unobtrusive to the beauty of your home.

All aircraft aluminum construction and a modular design provide long life and easy service. The SA series is designed to match industry standard lighting trim kits allowing integration with similar styled lighting products.

small aperture® collection

Real world solutions through the most advanced innovative technology

classic in-wall BE series

Perfection, to some, is the absolute expression of deep, accurate and dynamic sound. At James, we offer you the ideal: the aesthetic sound of perfection and precision. Now this incredible mixture of innovation and experience brings you a new class of in-wall speakers. The world's finest... only from James!

The BE series from James Loudspeaker features our proprietary Multi directional Beryllium-copper tweeter array. This arrangement provides a seamless, precise soundstage that assures extremely wide coverage of the listening area with uniform sound quality. Beryllium is seven times stiffer than titanium or aluminum, creating a 2nd resonance break-up mode beyond 22kHz for incredible 40kHz high frequency extension. Beryllium's extreme lightness makes for the ideal tweeter.

QX Collection In-Ceiling 13" grille

There are virtually limitless installation configurations when you choose James Loudspeaker. All of our products are timbre matched, resulting in an unrivaled audio experience.

technology without compromise

James introduces the QX Series, a complete new line of in-wall and ceiling speakers setting new standards for performance, appearance and installation ease. The new Quad tweeter array redefines the performance of speakers in this size and price class by providing high SPL, low distortion, high power handling and extremely wide coverage angle. The new grille design only protrudes 3/16" above the mounting surface and has an edgeless design for a very clean look designers will love. Installers will appreciate the ease of installation as the QX Series fits standard 4" wall construction. And of course James' proprietary welded, aircraft aluminum ensuring minimal acoustic internal-resonance.

In-wall, in-ceiling, in-cabinet Subwoofer System.
Inconspicuous by design, James PowerPipe Subwoofers offer seamless fusion of visionary technology and revolutionary performance. James' band-pass design produces a thunderous performance while delivering smooth frequency response and tight transitions. Tube flexibility allows for multiple port placement options. Rubber support straps suspend the PowerPipe between rafters, eliminating vibrations.

powerpipe

The PowerPipe architectural port options are the perfect solution for systems installed in cabinetry, in-ceiling, in-closet, an adjoining room, or under the floor; essentially any location!

PowerPipe 1000PT flexible tube allows for multiple port placement options

21" Energy Multiplied Bandpass Subwoofer

33AL 2-Way Bookshelf/Center

43CUBE Full-Range Bookshelf

Unrivaled in the industry...James' Innovative array of forward thinking features and patented technologies achieve flawless and faithful sound. Astonishing clarity of tone, harmony and voice is brought to life.

James Loudspeakers EMB subwoofers have redefined the subwoofer category. In fact, *The Complete Guide to High-End Audio* by Robert Harley includes James' proprietary EMB technology as a class of its own. Designed for listeners that demand the very best, EMB subwoofers deliver lower distortion, smoother frequency response, tighter transitions and greater bass extension than conventional designs.

freestanding subs & speakers

James has pioneered the design of ultra-slim sound bars and now offers two complete series. The SPL3 Series features a 3.5" woofer and is a mere 1.5" deep, yet plays down to 90 Hz. The SPL6 series feature 6.5" woofers for deep bass and high SPL, at only 2.75" deep. Both series feature LCR, Stereo and James' famous Centergy configurations. All bars are constructed of aircraft aluminum, are custom sized to fit your display, and include custom brackets. A wide range of matching on-wall/in-wall surrounds and subwoofers are available to complement any James sound bar.
